

Narges Farazan

Software Engineer / Producer

Address: Köln, Germany

Email nargesfarazan@gmail.com

Nationality: Iranian

Website: narges7596.github.io/portfolio-website-NF

Date of Birth: 05/1996

LinkedIn: linkedin.com/in/nargesfarazan

I'm a software engineer with **8 years** of experience in video game development, primarily using **C#** in game engines across multiple platforms. I played a key role in designing and developing one of Iran's **top-grossing online mobile games**, handling **backend**, **frontend**, and **database** systems. In my previous roles, I have been both a **project manager** and a team lead, successfully coordinating **cross-functional** teams including artists and designers.

I am eager to leverage my expertise in new IT domains beyond game development.

Work History

11/2021 – 06/2025

Software Engineer, Producer

Massive Miniteam GmbH
Pulheim, Germany

Massive Miniteam is a video game development company focused on PC and console games.

- Ported 4 video games on different platforms (PS4, PS5, Xbox One, Xbox Series, Switch, Stadia).
- Optimized game performance and reduced loading times on games built with Unity Engine, C#.
- Developed an in-house time-tracking web app using C# Blazer and Entity Frameworks.
- Built a custom Unreal Engine tool for importing animation assets.
- Automated achievements localization conversion with Excel-to-platform format tools.
- Designed and implemented PS5 haptic vibrations.
- Led the porting team as the producer, ensuring smooth communication between teams. Organizing the planning, update and retro meetings.
